

**Shopfloor
automation of
prominent engine
and steel
manufacturing
company**

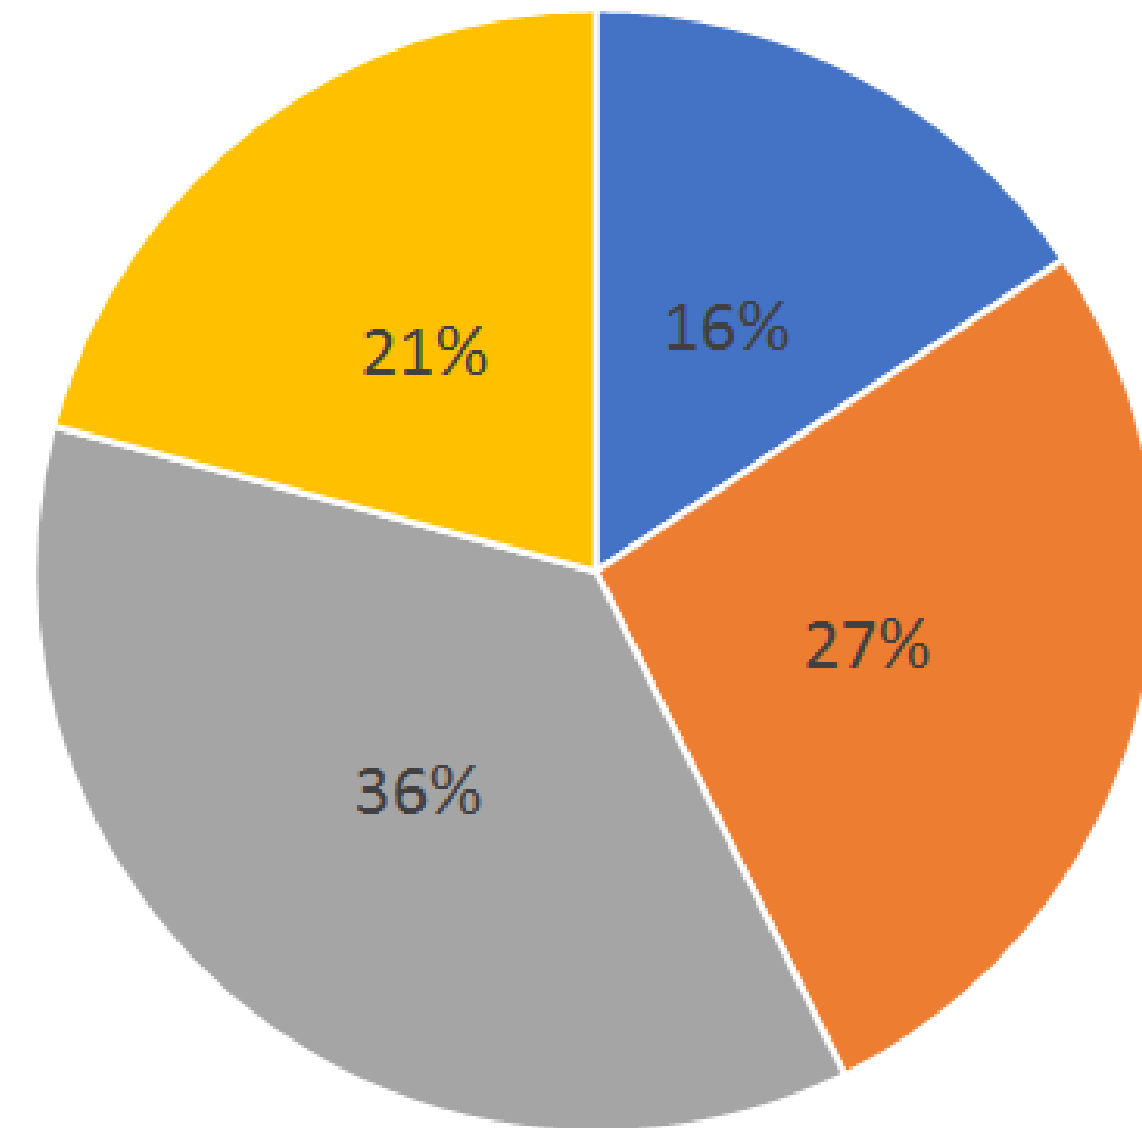

Solution

Retro type machine like engine test bed and CNC, HMC machine were provided a touch screen solution which would download data from server and capture date and time of every job done on these machines

Output

The captured data was used further to calculate performance, factory down time and overall efficiency

Digital Transformation

- Reduce Cost
- Mass Customisation
- Improve Service & Support
- Increase Reach

Let's solve!
